9/11 Memorial Museum

The Museum displays artifacts associated with the events of 9/11, while presenting stories of loss and recovery. The National September 11 Memorial Museum serves as the country's principle institution concerned with exploring implications of the events of 9/11, documenting the impact of those events and deploring 9/11's continuing significance. The Museum's 110,000 square feet of exhibition space is located within the archaeological heart of the World Trade Center site-telling the story of 9/11 through multimedia displays, archives, narratives and a collection of monumental and authentic artifacts. The lives of every victim of the 2001 and 1993 attacks will be commemorated as visitors have the opportunity to learn about the men, women, and children who died.

9/11 Memorial

Your ticket also includes this tribute of remembrance and honor to the nearly 3,000 people killed in the terror attacks. The Memorial's twin reflecting pools are each nearly an acre in size and feature the largest manmade waterfalls in the North America. The pools sit within the footprints where the Twin Towers once stood. The names of every person who died in the 2001 and 1993 attacks are inscribed into bronze panels edging the Memorial pools, a powerful reminder of the largest loss of life resulting from a foreign attack on American soil and the greatest single loss of rescue personnel in American history.
